

Sophos Endpoint Security and Control

Endpoint Security and Control Assess, control and protect all endpoints with one product

Cross-platform security and control for your desktops, laptops, file servers and mobile devices. Sophos delivers complete protection against viruses, spyware and adware, controls VoIP, IM, P2P, games and removable storage devices, and enables you to assess and control all endpoints.

- Combines anti-virus, anti-spyware and client firewall
 - Protects Windows, Macs and Linux
 - Automates management with one console
 - Controls VoIP, IM, P2P and games
 - Endpoint assessment and control
 - Includes expert 24/7 support
-
- Technical datasheet

We believe in making it easy for you to secure and control your desktops, laptops, mobile devices and file servers.

Preventive protection

Sophos Endpoint Security and Control gives you the best proactive protection against viruses, malware and unwanted applications across a wide range of platforms. We are the first endpoint vendor to incorporate NAC, enabling you to keep all managed, unmanaged and guest computers on your network healthy with up-to-date protection. One scan using our faster, lower impact agent will detect malware, adware, suspicious files and behavior, and unauthorized software.

Simplified management

Automatically deploy and manage the assessment, control and protection of all Windows, Mac, Linux and UNIX machines from one console. Our intuitive security dashboard gives instant visibility of the protection status on all computers, and fixing problems is as simple as 2 clicks. Our software even includes an integrated removal tool to automatically remove another vendor's anti-virus as part of deploying Endpoint Security and Control.

Trusted support

When you buy a Sophos license, you buy peace of mind: constantly updated software, free updates and upgrades for new releases, unmetered 24/7 in-house technical support, smart [SophosLabs™](#) detection and no hidden costs. Our Professional Services team can also assist in ensuring you maximize the return on your investment.
